#### BEST PRACTICE

# 1. Title of the Practice Interdepartmental BASANTOTSAV Celebration "RANG, RAAG, RAS"

## 2. Objectives of the Practice

- Develop better understanding of Disciplinary Knowledge through Experiential Learning
- ii. Foster Eco Friendly temperament and love for nature
- iii. Promote interdisciplinary approach to learning
- iv. Fulfil 4 Quadrants of Teaching Learning Practices viz. Lecture; Learning Activity; Demonstrations Hand On; Practical Assessment
- v. Inculcate creative, critical, analytical skills and scientific reasoning among the students
- vi. Impact Cognitive, Affective and Psychomotor Skills effectively
- vii. Promote Outcome Based Education
- viii. Provide opportunities for real life application of theory and reflective thinking
  - ix. Make learning experience diverse, interesting and enriching
    - 10.Create innovation ecosystem in the institute
    - 11.Instil self-directed, life-long learning, higher order skillset

## 3. The Context

Spring and "springtime" refer to the season, and also to ideas of rebirth, rejuvenation, renewal, resurrection and regrowth. Spring is the season during which the natural world revives and reinvigorates after the colder winter months. During spring, dormant plants begin to grow again, new seedlings sprout out of the ground and hibernating animals awake.

Basant Panchami is also known as Saraswati Puja. Goddess Saraswati at the entrance of the college is worshipped by the students and staff

to seek blessings for wisdom, language, music, art and knowledge and special puja is offered on Basant Panchami.

The birthday of famous Hindi Poet Suryakant Tripathi 'Nirala' is also celebrated on the day of Basant Panchami. Ujjain being a place of great Sanskrit poet and playwright Kalidasa involves selection of his Poetry and Text on Nature by Sanskrit Department.

This practice started with the belief that ART is for everybody and it can connect each one better with nature. Love and sensitivity towards nature can imbibe eco-friendly practices and conservation of biodiversity.

To mark the new beginnings and celebrate our traditions in an auspicious way the segregated celebrations of Basant Panchami in Music, Drawing, Hindi and Sanskrit Departments were brought into fusion in an innovative way and this practice has been continuing since last six years.

### 4. The Practice

All the members of staff and students mostly wear yellow coloured dress and the celebration starts with Saraswati Pujan and offering of Kesariya Bhaat as prasad to Goddess.

#### **Music Vocal and Instrumental Departments**

The Ragas signifying the onset of Basant are performed by students of Music Department in vocal and instrumental forms.

#### **Drawing and Painting Departments**

The students of Drawing and Painting Department simultaneously figure out the Ragas and songs to translate them into Live sketching and spot painting.

#### **Dance Department**

The Painting images and vocal renditions are immediately interpreted by the students of Dance Department and depicted through dance performances.

#### **Hindi Department**

The students of Hindi Department recite poems of the great Hindi poet Suryakant Tripathi 'Nirala'. An invited lecture on Nirala's poetry is also organized.

#### Sanskrit Department

Sanskrit Department conducts recital of Sanskrit shlokas on Saraswati Vandana and Kalidasa's texts or excerpts from Ritusamhar, Meghadootam etc. describing nature's beauty and importance of spring to celebrate Basant Panchami.

Poetry on love and spring, humorous love satire, etc. are also presented by teachers.

The performances are followed by prasad distribution of 'kesariya bhaat' (sweet yellow rice)

This celebration is conducted in the college garden amidst natural ambiance producing a very calming and pleasant effect.

# 5. Evidence of Success:

The success of Experiential Learning is evidenced in the instant decision making of the students with regard to their creative responses in the form of paintings and dances to the lyrics of the classical and semi classical songs on Basant.

Apart from the traditional evidence of exam and result, the outcome of Experiential Learning is more visible in tangible output of the activity which in itself exhibits the learning levels of observational learning, cognitive receptivity, direct engagement, performing and/or creating. This practice is successful in the sphere of involving all the six stages of Bloom's Taxonomy.

The performances and output are the evidences of the success of this integrated model of Experiential Learning that generates subject-specific learning outcomes. The performances of Classical Ragas, Dances, Creation of Spot Exhibition of Paintings, Recital of Poetry, Reading of Text Excerpts, Lecture are the outcomes of hands on synergising and problem solving by the students which are evidenced by the staff as a whole and judged by the subject-experts on the spot.

The Model of this practice provides a platform to conduct on-the-spot simulation of variety of forms of art and literature to assess their synergies and trade-offs.

#### 6. Problems Encountered:

This is a joyous occasion and the spirits of the festivity and this celebration is contagious. Singing and Playing Basant, Hindol etc. and dances on Sarasvati Vandana and Ragas need practice beyond class hours engaging both staff and students for long hours.

Spot Paining in a short span of time within the duration of ongoing programme is a challenge and volunteering of students to take up this task every year is a challenge.

Satire, poetry reading, textual narration from Hindi and Sanskrit on Basant have to depict nature, love, romance maintaining the dignity for a public gathering including students.

Resources required include setting up of stage, sound system and arrangements in the garden. Drawing Stands, Hardboards. Sheets, Colours etc. are required sufficiently.

# COLORFUL BASANTOTSAV IN GGPGC

The department of Hindi, music, drawing and IQAC of Government Girls Post-graduate College organised a colourful celebration of Basantotsav this year also. The programme was inaugurated by the in-charge principal Dr Anita Manchandia with the worship and garlanding the portrait of Goddess Saraswati. The girls of music department presented Saraswati Vandana. The chief guest of the program Dr Shashi Joshi presented a description of the life and literature based on nature of the great poet Nirala. She also recited Nirala's poem 'Juhi Ki Kali'. Presentations of various

forms were given by the students and staff in the programme. Sitar play was presented by Aastha Saxena. Students of music department Falguni Nandwal and Divya Pathak

presented a beautiful dance in the direction of Dr Priyanka Vaidya. Dr Nirmala Shah presented a Bhajan. Staff members Dr Archana Parmar, Dr Abha Dixit, Dr Rekha Sharma, Dr Ranjana Sharma, Dr Rashmi Bhargava and Dr Neeta Tiwari presented Basant song. The students of drawing and painting subject made pictures based on Raga Ragini under the direction of Dr Ranjana Wankhede. Dr Nikhil Joshi narrated a satire composition. Dr Vinod Kumar Gupta presented Basant's message poem. Programme was conducted by Dr Sadhna Nirbhay and Dr Parmar proposed a vote of thanks.

### Colourful cultural extravaganza on spring theme held in GGPGC

FP NEWS SERVICE Ujjain

A colorful spring festival of song, poem, music and dance was organised under the joint auspices of music and painting and IQAC of the Government Girls Post-graduate College (GGPGC). The highlight of the programme was that the staff and the girls all turned up in yellow costumes.

Dr Vandana Tripathi gave a talk on the description of Basant season in Kalidasa's literature. MA students of English read poems of Wordswath and Shally Un-der the direction of Dr Archana Parmar and Dr Rupali Jain, the melodious presentation of Bandish and Tarana Badal Aayo Basant, based on the raga Basant, was presented. The accompaniment was done by Rajendra Karharkar on

GGPGC students celebrate Basantotsava FP PHOTO

the Tabla. With this, the students of the drawing gave immediate illustration of the poems.

An exhibition of pictures on spring season, made by the students was also organised under the direction of Dr Ranjana Wankhede and Dr Vikrant Shah. After this, the girls performed

group dances under the direction of Dr Priyanka Vaidya. Dr Nikhil Joshi read the satirical composition. Dr Vinod Kumar Gupta read a poem named Swagat hai naye Basant ka.

In her presidential address principal Dr Anita Manchandia said that due to the spring season there

has been a new energy communication with nature we are also filled with this. It will take us to a height. The program started with Saraswati Pujan. The programme was conducted by Dr Priyanka Vaidya and Dr Vikrant Shah. Dr. Archana Parmar expressed gratitude.

# Second Best Practice AMRIT MANTHAN

### Herbal Products Preparation and Sale

#### BEST PRACTICE

# 1. Title of the Practice "Amrit Manthan"

Herbal Products "Amritansh" Preparation and Sale by Students of Pharmaceutical Chemistry

### 2. Objectives of the Practice

- i. Develop a better understanding of Disciplinary Knowledge
- ii. Nurture eco-friendly and healthy practices
- iii. Promote research and development acumen among UG and PG students
- iv. Provide opportunities for real life application of theory and reflective thinking
- v. Make OBE diverse, interesting and enriching
- vi. Achieve better attainment level of Programme and Course Outcomes through value addition to curriculum
- vii. Foster collaborative group learning
- viii. Create innovation ecosystem in the institute
  - ix. Make students employment ready
  - x. Equip students with entrepreneurial skills and aptitude for market survey, raw material collection, packaging, cost-benefit analysis, promoting and selling their products
- xi. Instil self-directed, life-long learning, higher order skillset

### 3. The Context

Over the past three decades there has been a constant, and at times, exponential growth in global interest in the use of herbal products. Herbal medicines, including finished herbal products and the starting materials for their production, such as medicinal plants, herbal materials, herbal preparations and herbal dosage forms, are moving into international commerce and global trade, which reflects not only their increased economic value but importance as beneficial products without side effects.

The field of Pharmacology which encompasses drug composition and properties, functions, sources, synthesis and drug design, molecular and cellular mechanisms, organ/systems mechanisms, transduction cellular communication, molecular signal or diagnostics, interactions, chemical biology, therapy, and medical applications and antipathogenic capabilities. Alongside the increase inpopularity and usage of herbal medicines was evident in the global as well as local market. Against this backdrop the references of drug or medication action, where a drug was defined as any artificial, natural, or endogenous molecule triggered an interest among the students and staff of Pharmaceutical Chemistry to experiment with the Herbal Preparations for few products of cosmetic and medicinal value.

The safety and efficacy of herbal medicines largely depend on their quality. Unlike pharmaceutical products formulated from single-molecule chemicals produced synthetically or by isolation from natural source materials employing reproducible methods, herbal medicines consist of simple processed herbs or finished herbal products prepared from source materials containing a multiplicity of chemical constituents, the quality and quantity of which can vary from batch to batch due to intrinsic and extrinsic factors. Consequently, the quality of finished herbal products is

greatly influenced by the quality of the raw materials and the intermediates; and the requirements and methods for quality control of finished herbal products, particularly for mixed herbal preparations, are far more complex than those employed for single-molecule chemical medicines. Therefore, the quality of herbal products available in the market also may also have been compromised in case of quality. The students took up this challenge to prepare few genuine herbal products.

#### 4. The Practice

#### **Products:**

The students of Pharmaceutical Chemistry prepare Herbal products like

- Lip Balm,
- ❖ Face Pack,
- Charcoal Soap
- Pain Relieving Balm
- Pain Relieving Oil
- Chyawanprash
- Herbal Holi Colours.
- Post COVID new additions to this menu are:
- Herbal Hand Wash and
- Herbal Sanitizer
- **\*** The students prepare Holi Colours using only flowers.

The students have set up a Pharmaceutical Garden adjacent to the Laboratory and have grown medicinal plants and herbs with a future plan to obtain some raw material from there.

Another innovative initiative in this area is applying QR Code to the plants, which on scanning gives the properties, uses and cautions of the corresponding plant/herb.

This whole practice is done under the mentorship of faculty members in the Business Incubation Centre SYNERGY. Preparation is followed by Packaging and Labelling of the products.

#### **Quality Check**

The products are initially tested by the teachers of Chemistry Department for the result and the products are package for sale only after the required changes, if any.

#### Sale in Exhibition/Stalls under Earn With Learn Scheme:

These products are set up for sale on the stalls in the college under Earn with Learn Scheme. In two sessions these products were sold in the Open Career Fair organized by the college. The amount collected from sale is reinvested in the next cycle of preparation.

This practice is unique in introducing Outcome Based Education, real life application of theory, research and development, group activity, entrepreneurial skills, environmental ethics and life-long learning.

### 5. Evidence of Success:

The good quality of products is the best evidence of success of this practice. The products are well received by the users and the constant improvement and advancements are experienced by the staff members. The assessment of the learning outcome is therefore not limited to the teachers alone and the objective feedback of the peer group and teachers have helped the students to intensify their research and improve the quality and efficacy of their products. The primary feedback of dryness after use of charcoal soap or absence of foam in the hand wash etc, helped the students to improve on these lines.

The sale of products and profit generation which was once handed over to the JBS of College and is now reinvested in the next cycle of preparation is an evidence of the success of this practice.

The biggest evidence of this practice are that every year fresh batch of students get inclined to join this practice and they spare additional long hours in the lab engrossed in this practice voluntarily.

### 6. Problems Encountered:

This practice went beyond practical lab sessions and aimed at preparing products for use and sale. It was a challenge to research the types of ingredients and their ratio to be used in the preparation. The products had to be totally herbal and yet have an appealing value for the users on the level of texture, appearance, smell and result. Preparation of these products in the laboratory produced small quantities. Since this practice has been in use for more than six years the initial years were spent on research and the products were gradually diversified.

Hence the problems encountered can be summed up as following:

The practice involves rigorous efforts and long sessions which demand extra time besides classes and routine practical sessions.

The scale of production is very small due to the constraints of time and money.

In comparison to established brands and well packaged products available in the markets the products appeared as amateur attempts so initially the sale of products even to the staff was difficult due to lack of trust. Later the products are being produced on demand other than the Sale Exhibitions.

The process of patenting requires procedural efforts which got postponed due to COVID, however the products have been registered.

### Glímpses of Practice

#### Manufacturing and Testing:

#### Research and product Modification and Manufacturing

### **Quality Testing:**

### **Products Ready for Sales:**

### **Inauguration of Sales:**

Stall in Open Career Fair

### Stall under Earn with Learn

### HERBAL COLOURS SALE IN GGPGC

FP NEWS SERVICE Uliain

An exhibition-cum-sale of self-made eco-friendly Holi colours was organised by the students of the Department of Chemistry and Pharma Chemistry and Business Incubation Centre 'SYNERGY' of Government Girls' Post-Graduate College (GGPGC) under the Earn While Learn Scheme.

The programme was inaugurated by the Principal of the college, Dr HL Anijwal, who said that the

research and development done by the pharma students in developing the herbal Holi colours with the use of different flowers is praiseworthy. College staff including Dr Rashmi Bhargava, Dr Samina Qureshi, Dr GD Agarwal, Dr Neha Tripathi, Dharmesh Rathore and Kajal Pandey were present in the pro-gramme. The staff and students purchased the products and praised the gentle aroma and quality of the colours.

The students of Pharmaceutical Chemistry responded to
The FIRST COVID 19 international spread
and prepared a sanitizer even before the
Nation-wide Lockdown was executed.

### College students sell herbal products under Atmanirbhar Bharat Abhiyaan

FP NEWS SERVICE

Taking cue from the Atmanirbhar Bharat Abhiyaan the chemistry and pharmaceutical chemistry and botany and microbiology departments of Government Girls Post-Graduate College (GGPGC) prepared herbal products under the Business Incubation Centre, Synergy of the College.

The students of the college are honing their entrepreneurial and technical skills under the guidance of the teachers with the support of the Internal Quality Assurance Cell.

The students of pharmaceutical chemistry prepared Lip Balm, Pain Relieving Oil, Pain Relieving Balm, Charcoal Face Soap and Hand Sanitizer in the Pharma Laboratory under the mentorship of faculty

members Dharmesh Rathore, Mayuri Soner and Kajal Pandey.

They sold these products under the Earn while Learn scheme to recover the cost incurred by the students and the profit generated through the sale was reinvested in the college fund.

The students of microbiology prepared an organic liquid fertilizer "Jeevamrut" which contain efficient living soil microorganisms for improving plant growth and agriculture productivity in a sustainable.

It was prepared through fermentation process under the mentorship of faculty Sakshi Sardana. Such cost effective fertilizers containing eco friendly bio-inoculants were also sold on the stall set-up in the college. The head of pharmaceutical chemistry Dr GD Agrawal and the head of botany department, Dr Manoj Kumar Sisodiya stated that the students are learning to experiment, improvise, and understand the practical application of syllabus.

Principal Dr Anita Manchandia said that students, besides their curriculum are also exploring the skills of market survey, packaging and marketing under "Synergy".

IQAC coordinator Dr Neeta Tapan said pharmaceutical chemistry is engaged in the preparation of herbal products for the last five years but now the concepts of Atmanirbhar Bharat Abhiyan and Vocal for Local have motivated the students to diversify the products to meet the professional marketing standards.
